Danish Sultan

Email: danishsultan007@gmail.com Phone: +91-9741874152 LinkedIn: danishsultan007

DevOps Engineer with 6.5+ years of experience in CI/CD automation, infrastructure provisioning, and high-availability system design. Proficient in Jenkins, Docker, Ansible, and AWS, with a strong track record of implementing zero-downtime deployments and reducing deployment time by 80%. Experienced in managing scalable production environments, troubleshooting critical issues, and improving system reliability and security. Actively seeking DevOps Engineer opportunities.

SKILLS

Languages and OS: SQL, Shell Scripting, Python Scripting, YAML, Ubuntu, RHEL, CentOS, Rocky Linux
Cloud & Infrastructure: AWS, Amazon EC2, S3, Route 53, IAM, Cloudflare, DNS, VMware vSphere, OpenStack
DevOps & Automation: Jenkins, Docker, Kubernetes, Ansible, Terraform, CI/CD
AI-Assisted Development: GitHub Copilot, ChatHPE (in-house LLM), Claude (prompt engineering for scripting, debugging, and automation)
Version Control & Monitoring: Git, SVN, GitHub, GitLab, Zabbix, New Relic
Communication & Collaboration: Microsoft Teams, Slack, GitHub Issues and Jira
Messaging & Servers: ActiveMQ, RabbitMQ, Apache2, Apache Tomcat, Gunicorn, WildFly

WORK EXPERIENCE

Hewlett Packard Enterprise *Bengaluru, India*
Systems Software Engineer II *Mar 2023 – Mar 2026*

- Led end-to-end installation and configuration of the NFV-O product as part of the Telco Solutions team on OSS domain, via Ansible, for enterprise telecom customers including Verizon, Telefónica, and Deutsche Telekom (DTAG).
- Supported deployment across Simplex Monolithic, Distributed, HA, and Geo-Redundant environments, scaling to 10,000+ concurrent VNF instances.
- Designed the In-Service-Software-Upgrade (ISSU) deployment architecture using additional VMs and extra virtual IPs enabling rolling upgrade and switchover via Ansible, eliminating prior switchover downtime and data loss, achieving 0% downtime for product upgrades.
- Automated installation pipelines for the product's development environment using Jenkins to ensure consistent and repeatable deployments.
- Collaborated cross-team with the cloud infrastructure team on Ansible-driven deployments inside containerized/Kubernetes-hosted environments.
- Leveraged AI-assisted tools (GitHub Copilot, HPE's in-house ChatHPE) via prompt engineering to accelerate scripting, debugging, and automation workflows.
- Owned and resolved customer-reported issues, achieving 90%+ defect containment.
- Strengthened product security by identifying vulnerabilities and driving security enhancements for exposed credentials and tokens.

EOX Vantage *Bengaluru, India*
DevOps Engineer *Jul 2019 – Feb 2023*

- Led end-to-end DevOps operations for the SaaS product, serving clients in the Banking/Insurance domain.
- Designed CI/CD pipelines using Jenkins with GitHub/GitLab webhooks, reducing deployment time by 80%.
- Containerized applications using Docker and Docker Compose for build phase and development environment setup.
- Managed AWS infrastructure (EC2, S3, VPC, IAM, Route 53), including EC2 instance provisioning and S3-based database backups/snapshots.
- Deployed applications across Node.js, PHP (Laminas), Go, and React environments.
- Deployed and managed cloud native applications using Jenkins, connecting to target servers via the SSH Agent plugin to run containerized build phases in Docker, then pushing build artifacts to target nodes through bash/Python deployment scripts.
- Developed Python scripts for automation, log parsing, and operational task optimization.
- Implemented monitoring using Zabbix, New Relic, Grafana Loki, and CloudWatch ensuring 99.9% uptime.
- Configured Linux services and application environments including Flask apps on Gunicorn.
- Collaborated with DevSecOps teams to remediate vulnerabilities.
- Mentored team members on DevOps tools and practices.

EDUCATION

PES University *Bengaluru, India*
Bachelor of Technology in Computer Science *Jul 2015 – July 2019*
